

FLEXAKIND

FLUBENDIAMIDE 3.5% + HEXACONAZOLE 5% WG

Insecticide and [fungicide](#) are combined in FLEXAKIND. It provides a reliable control using the two most tested compounds. FLEXAKIND is one surefire way to treat Paddy's leaf folder and sheath blight.

Mode of Action

FLEXAKIND is a combination of Flubendiamide which exhibits larvicidal activity as an orally ingested toxicant by targeting and disrupting the Ca²⁺ balance. This results in rapid cessation of feeding and extended residual control. Another strong molecule is HEXACONAZOLE which is a highly effective systemic fungicide with protective and eradicated action.

Features & Benefits

- [Insecticide](#) and fungicide are combined in FLEXAKIND.

- FLEXAKIND is one surefire way to treat Paddy's leaf folder and sheath blight.
- FLEXAKIND consists of both systemic and contact molecules.
- FLEXAKIND along with better Pest and disease control gives lush green leaves with better crop health leading to bumper production.
- Reduce cultivation cost as it provides control from both disease and insect pests.

Crop Recommendation

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Paddy	Leaf Folder, Sheath Blight	400 gm/acre

Pack Sizes

1 kg	500 gm	250 gm	100gm
