

## QUIZAMAX

### QUIZALOFOP ETHYL 5% EC

QUIZAMAX is a post emergent herbicide for the control of grassy weeds in broad leaf crops. It is recommended for the control of weeds in Soybean, Cotton, Groundnut, Blackgram and Onion.

### Mode of Action

QUIZAMAX is an effective systemic herbicide that is absorbed from the leaf surface and moves through the xylem and phloem of the plant. QUIZAMAX is promptly absorbed and translocated by the weeds and kill them.

### Features & Benefits

- QUIZAMAX controls grassy weeds in broad-leaf crops.
- QUIZAMAX has good rain fastness.

- QUIZAMAX [herbicide](#) is safe to crop.
