

TOLFETOX

Tolfenpyrad 15 % EC

TOLFETOX is highly effective against sucking pests complex, biting & chewing type (lepidopterans) pests on wide range of crops TOLFETOX works comprehensively for more than one target pests and therefore reducing the cost of crop protection.

Mode of Action

TOLFETOX is a novel chemistry which belongs to pyrazole class of insecticides and offers unique mode of action TOLFETOX results into rapid responses including cessation of movement, feeding, lack of fecundity and death of the target pests. TOLFETOX is a contact insecticide that inhibits an organism's energy metabolism which can also work as a contact fungicide.

Features & Benefits

- TOLFETOX has a broad spectrum of activity

- TOLFETOX is highly effective on insects and resistant to other existing insecticides.
- TOLFETOX has antifeedant action due to which the target pests stop feeding immediately
- TOLFETOX is active in different developmental stages i.e. eggs, larvae/ nymphs & adults of target pests.
- TOLFETOX [Insecticide](#) offers fast and effective control of target pests and diseases leading to healthy crop
- TOLFETOX is an effective tool for IRM (Insect Resistance Management) which prevents resistance development by rotating with other products.

Crop Recommendation

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Cabbage	Diamond back moth, Aphids	400 ml/acre
 Okra	Aphids, Jassids, Thrips, Whitefly	400 ml/acre
 Cotton	Aphids, Jassids, Thrips, Whitefly	400 ml/acre
 Cumin	Aphids, Thrips, Powdery Mildew, Blight	400 ml/acre
 Chilli	Aphids, Thrips, Powdery Mildew, Anthracnose	400 ml/acre
 Mango	Hoppers, Thrips, Powdery Mildew, Anthracnose	400 ml/acre
 Onion	Thrips	400 ml/acre

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Pomegranate	Thrips	400 ml/acre

Pack Sizes

1 Ltr	500 ml	250 ml
