

HEXAHUGE-V

Hexaconazole 5 % + Validamycin 2.5 % SC

HEXAHUGE – V is a premix combination of fungicide and antibiotic in suspension concentrate form. HEXAHUGE – V is effective for rice disease management.

Mode of Action

HEXAHUGE – V contains a triazole group fungicide hexaconazole and an antibiotic fungicide validamycin. HEXAHUGE - V has dual mode of action. Hexaconazole has inhibitory action on ergosterol biosynthesis and validamycin has inhibitory action on fungal trehalase resulting in dehydration of fungal spores.

Features & Benefits

- HEXAHUGE – V has protective and curative actions.

- HEXAHUGE – V controls the spread of diseases.

Crop Recommendation

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Paddy (Rice)	Blast & Sheath Blight	400 ml/acre

1 Ltr	500 ml	250 ml	100 ml
