

PYRABLESS

Pyraclostrobin 20 % WG

PYRABLESS helps growers control diseases and improve overall Plant Health. That means potentially higher yields, better ROI and, ultimately, better profits. And that means more than just money in the bank.

Mode of Action

PYRABLESS helps control soilborne *Rhizoctonia solani* while providing Plant Health benefits, including healthier, more vigorous roots. PYRABLESS helps improve seedling health and allows for more rapid and uniform emergence — even under cold and wet conditions.

Features & Benefits

- PYRABLESS is a fast-acting, broad-spectrum fungicide that delivers a high level of activity on more than 50 major diseases that can threaten yield and crop quality.

- Not only PYRABLESS provide excellent disease control, it actually promotes improved Plant Health. The unique chemistry of its active ingredient enables more efficient nitrogen uptake, more robust plant growth and better stress tolerance to heat, hail, wind and drought.

Crop Recommendation

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Tomato	Early Blight	150 – 200 gm/acre
 Soybean	Frog eye leaf spot (Cercospora) & Alternaria leaf spot	150 – 200 gm/acre
 Cotton	Alternaria Leaf blight	200 gm/acre
 Groundnut	Tikka disease	200 gm/acre
 Maize	Turcicum leaf blight	200 gm/acre
 Banana	Sigatoka leaf spot	300 gm/acre
 Chilli	Anthrachnose	200 gm/acre

Pack Sizes

200 gm	100 gm
