

MANCONOVA

Mancozeb 63% + Carbendazim 12% WP

MANCONOVA is a very effective broad-spectrum systemic and contact fungicide with crops' protective and curative action. It contains plant nutrients such as Zn & Mn, which are highly effective in improving the vigor of the crop. It can be used as a foliar spray to control a wide range of fungal diseases in various crops. The product is also used for seed treatment.

Mode of Action

MANCONOVA is a Broad Spectrum Systemic and Contact Combination [Fungicide](#). It successfully controls Leaf Spot and Rust diseases in Groundnut and Blast diseases of paddy crops.

Features & Benefits

- A low dosage is enough for fighting and resisting the disease.
- Spreads uniformly above the leaf surface and stays for a long time over the leaf surface.

- Keeps the leaf green and healthy and also enhances the yield.
- Rapidly absorb formula for the plants, translocated easily inside the whole body of the plant. It remains effective in rain fastening.

Crop Recommendation

CROPS	TARGET PEST/ DISEASE	DOSAGE
 Paddy	Blast	120 gm/acre
