

BIFEN FORCE

Bifenthrin 10% EC

BIFEN FORCE is a new generation broad-spectrum insecticide of Pyrethroid ester group. BIFEN FORCE controls bollworms, whitefly, stem borer, leaf folder, GLH & termites. BIFEN FORCE has strong binding property with soil, thus it persists and exhibits extraordinary longer duration control of termites.

Mode of Action

BIFEN FORCE is a non-systemic insecticide with contact and stomach action. BIFEN FORCE acts on the nervous system of insects and disturbs the function of neurons by interaction with the sodium channel.

Features & Benefits

- BIFEN FORCE controls different types of sucking & chewing pests.
- BIFEN FORCE [insecticide](#) gives knock-down killing of insect pests.

- BIFEN FORCE has a strong biphenyl bond which provides longer residual control of pests.
- BIFEN FORCE is an effective termiticide as well.
- BIFEN FORCE has phyto-tonic effect which improves the vigour of crops.
- BIFEN FORCE is relatively safer for humans and does not cause any skin irritation to spray operators.
