

TEMBO MAX

Tembotrione 34.4% SC + 400 gm Surfactant

Broad spectrum post-emergence herbicide TEMBO MAX is advised for use in conjunction with surfactant for effective control of grassy and broad leaf weeds in Maize.

Mode of Action

Tembotrione inhibits the enzyme activity. The inhibition of the enzyme prevents the production of carotenoid (plant pigments). Lack of carotenoids deprives chlorophyll, causing chlorophyll to bleach.

Features & Benefits

- TEMBO MAX is a broad spectrum herbicide
- TEMBO MAX is safe to crop
- TEMBO MAX provides fast control over narrow and broad leaf weeds.
- TEMBO MAX minimises the labour cost of farmers.
- TEMBO MAX helps in increasing yield.
